EDUCATION

Chaitanya Bharathi Institute of Technology (CBIT) — **Hyderabad, India**
B.E. in Artificial Intelligence & Machine Learning (CGPA: 8.91/10) — *2024 – 2027*

Government Polytechnic Hyderabad — **Hyderabad, India**
Diploma in Computer Science & Engineering (CGPA: 9.64/10) — *2021 – 2024*

EXPERIENCE

Crimson Innovative Technologies — **Hyderabad, India**
Software Development Intern | Java, Android SDK, Firebase, MySQL — *Jun 2023 – Nov 2023*

- Shipped 2 production applications backed by Firebase Realtime Database and MySQL, architecting modular full-stack codebases using OOP patterns to ensure long-term maintainability.
- Accelerated average screen load time by 20% by optimizing complex MySQL queries via indexing and implementing asynchronous caching to eliminate UI blockages.
- Engineered an on-device object detection pipeline utilizing YOLOv5, transfer learning, and custom data augmentation, validating model inference accuracy across structured test cycles.

PROJECTS

ResumeVerify AI – Agentic Credential & Code Audit Engine — github.com/Saimanoj2325/ResumeVerifyAI
Python, LangGraph, FastAPI, Groq (LLaMA 3), FAISS, Sentence-Transformers, Pydantic, Docker

- Engineered an asynchronous multi-agent audit pipeline using a LangGraph conditional state graph, dynamically routing candidate claims across parallel code-inspection, activity-analysis, and LeetCode verification agents.
- Built a retrieval-grounded evidence engine parsing PDF resumes via PyMuPDF and indexing semantic chunks using Sentence-Transformers (all-MiniLM-L6-v2) into session-scoped FAISS vector stores for claim verification.
- Integrated LeetCode GraphQL and GitHub REST APIs, pairing public data collection with Python AST static analysis to audit cyclomatic complexity, error handling, and detect tutorial-code fingerprints.
- Implemented an adversarial critic review pass to uncover unsupported claims, enforcing strict Pydantic schema validation on synthesis reports and streaming real-time agent lifecycle events via Server-Sent Events (SSE).

AyurSutra – Panchakarma Clinical Care & Knowledge Platform — github.com/Saimanoj2325/AyurSutra
React 18, FastAPI, Mistral LLM, Firebase, Python

- Architected an AI-native SaaS platform digitizing therapy management for Ayurvedic clinics, pairing a React 18 frontend with an asynchronous FastAPI backend and Firebase Auth.
- Designed a domain-specific retrieval pipeline using a custom TF-IDF retrieval engine across 26 clinical modules, structuring prompt context windows to ground Mistral LLM inference on verified protocols.
- Deployed the production LLM workflow, actively optimizing prompt templates, context window boundaries, and inference latency trade-offs.

GeoAttend – Geofenced Attendance with On-Device Face Verification — github.com/Saimanoj2325/GeoAttend
Android SDK, ML Kit, MobileFaceNet, Java

- Designed a native Android attendance system featuring 6-layer security by integrating geofencing, MobileFaceNet 512-dimensional embeddings across 5 poses, and randomized liveness detection.
- Validated the security pipeline through instrumented testing, achieving 95%+ spoof detection accuracy across 1,000+ location-spoofing attempts while optimizing FaceNet inference latency to <80 ms.

TECHNICAL SKILLS

AI & Machine Learning: LangGraph, Multi-Agent Systems, LLaMA 3, Mistral, RAG, FAISS, Sentence-Transformers, MobileFaceNet, YOLOv5, OpenCV, scikit-learn.

Languages & Frameworks: Python, Java, JavaScript, SQL, FastAPI, React 18, Android SDK, Pydantic.

Developer Tools & Systems: Docker, Git, GitHub Actions, Linux, Claude Code, REST APIs, GraphQL, Server-Sent Events (SSE), MySQL, Firebase.

Core Fundamentals: Data Structures & Algorithms, Object-Oriented Programming (OOP), Operating Systems, DBMS, Computer Networks.

LEADERSHIP & ACTIVITIES

CBIT Open Source Community (COSC) — Joint Secretary — **Aug 2024 – Present**

- Directed a technical team of 40 developers and orchestrated recurring open-source contribution drives across student-led software initiatives.
- Drove 1,700+ participant registrations for Hacktoberfest as a core organizing committee member and enabled 50+ first-time pull requests through a version-control mentorship initiative.

VMEDHA Club — Technical Head — **Sep 2024 – Present**

- Scaled the VIVE-LE-Tech fest to 2,000+ participant registrations by co-organizing the event and executing technical marketing strategies.

- Hosted and evaluated 200+ students in the "DSA Master" competitive programming contest by independently building and maintaining a custom algorithmic challenge platform.

Competitive Programming — Algorithm Enthusiast **Aug 2023 – Present**

- Solved 400+ algorithmic challenges across LeetCode and GeeksforGeeks, demonstrating proficiency in dynamic programming, graph traversal, and complexity optimization.
